...

Author: Anh Dao

You secure a job as the executive director of a family counseling

agency. As you go through your files you discover that five years

before you took the job the agency selected 100 families and

counseled them using a strict behaviorist model. The agency

took the next group of 100 families and counseled them using

Satir's experiential conjoint family therapy model. Each family

received 12 sessions of therapy and each family took a before-and

after-assessment that accurately depicted how well the

family was functioning. You decide to run a t test to examine

whether or not a statistically significant difference is evident between

the two approaches. This is

Please choose only one answer:

- an ex post facto (i.e., after the fact) correlation study.
- causal-comparative or ex post facto (i.e., after the fact) research
- a true experiment.
- simple survey research.

...

Author: Anh Dao

A researcher wants to prove that structural family therapy is the most effective modality. She conducted a study a year ago using a significance level of .05. Several colleagues felt her significance level needed to come down. She thus ran the same basic experiment again with new people using a significance level of .01. Her chances of making a Type I error or so-called alpha error went down. Now assume you compare her new research with her old research. What could you say about the possibility that her results will indicate that structural family therapy was not significantly different when in reality it truly is significant?

Please choose only one answer:

- Statistically, nothing
- The chance of this occurring will go down when compared to the first experiment.
- The chance of this occurring increases when compared to the first experiment.
- It would totally depend on the sample size.

4.1.95. A question on the NCE asks you to compute the coefficient of determination.

Author: Anh Dao

A question on the NCE asks you to compute the coefficient

of determination. You are given a correlation coefficient of .70.

How would you mathematically accomplish this task?

Please choose only one answer:

- You would subtract .70 from a perfect correlation of 1.00
- You would multiply the mean of the population by .70
- You would add .70 to a perfect correlation of 1.00
- You would square the .70.

...

Author: Anh Dao

A correlation coefficient between variables X and Y is .60. If we

square this figure we now have the coefficient of determination

or true common variance of 36%. What is the coefficient

of nondetermination that shows unique rather than common

variance?

Please choose only one answer:

- There is no such concept
- You would subtract 36 from 100.
- It would still be 36%.
- It would be 64%.

...

Author: Anh Dao

The 2005 ACA code addresses end-of-life issues since these issues

are getting a high degree of social attention (e.g., the Oregon

assisted suicide law and the Terri Schiavo right-to-die case).

The new code

Please choose only one answer:

- finally takes a moral stance on abortion and gives counselors a road map for dealing with this issue.
- suggests that counselors who are helping terminally ill clients who are thinking of hastening their own death must break confidentiality
- suggests that counselors who are helping terminally ill clients who are thinking of hastening their own death would have the option of breaking or not breaking confidentiality
- suggests that a counselor who morally refuses to assist a terminally ill client who wants to hasten her death (and hence, wishes to explore end-of-life options) is acting in an unethical manner

Author: Anh Dao

A client wants to read her record. Pick the statement which is not accurate.

Please choose only one answer:

- You should allow her to read the record or a summary of it because she has an ethical right to do so
- You should allow her to read it, however, you should go back and change things you don't want her to see; for example, the fact that you said she was schizophrenic
- You should allow her to read the record realizing that it is best if you enter the information as soon as possible after the session and then sign and date the entry
- Since your agency inputs the client's record on a computer, each entry will be dated and have a time on it. You could then print the document for her perusal

Author: Anh Dao

A counselor is seeing a client on a managed care plan. Unfortunately,

the client has used up her maximum number of sessions

for the year. The counselor is convinced that the client is in

need of additional counseling, however, the counselor's agency

will not allow him to see her for any additional sessions. The

best plan of action would be for the counselor to

Please choose only one answer:

- Refer the client for continued counseling to a practitioner who will see the client whether or not she has managed care benefit
- Empathize with the client, but be sure to explain that she is catastrophizing (an irrational thought pattern delineated by Albert Ellis) and use REBT, a cognitive therapy, to help her cope with the fact that she cannot be seen again until next year.
- Threaten to sue the managed care company, since this would be in violation of ethical care for the client
- See the client, but don't tell your supervisor. This is both legal and ethical.

4.1.140. Conversion or reparative therapy is intended to change sexual orientation...

Author: Anh Dao

Conversion or reparative therapy is intended to change sexual orientation and behaviors from gay to straight.

Please choose only one answer:

- The literature in scientific and peer reviewed journals does not indicate that a person's sexual orientation can be altered from same sex attraction to opposite sex attraction
- ACA prohibits counselors from practicing conversion or reparative therapies although no studies exist in this area
- Longitudinal studies with clients who have been through reparative or conversion therapy indicate that the treatment is effective, but it still remains unethical.
- ACA ethics indicate that a counselor trained in conversion or reparative therapy can practice these modalities if the client insists on the treatment.

Author: Anh Dao

The new ACA ethical guidelines stipulate that a counselor can refrain from making a diagnosis if the counselor believes the diagnosis could harm the client or others.

Please choose only one answer:

- Therefore, a counselor could ethically diagnose all clients as having an adjustment disorder to secure insurance since this diagnosis is somewhat benign and not likely to harm the client
- A counselor could refrain from making an Axis I or an Axis II diagnosis if it is in the best interest of the client.
- A decision to refrain from making a diagnosis is ideally made in collaboration with the client, although the counselor has the final say
- Choices "b" and "c" are both correct.
